Walbridge, OH | (567) 249-2185 | yourwishismine@gmail.com | <https://daniel-danielkill-online.pages.dev>

PROFESSIONAL SUMMARY

Results-driven IT Manager and Systems Developer with over two decades of experience leading enterprise IT operations, modernizing infrastructure, and executing complex technology migrations. Combines deep systems administration expertise with modern backend development (Node.js, Go) and local AI integration. Skilled in aligning technology initiatives with business objectives, automating processes, and enhancing operational efficiency.

TECHNICAL SKILLS

- **Languages & Frameworks:** Node.js, Go (Golang), C, COBOL, BASIC
- **Systems & Virtualization:** Windows 11, Ubuntu Desktop, Hyper-V Virtualization, Network Administration
- **AI & Development Tools:** Local LLM Deployment (Ollama), AI-Assisted Code Refinement, Git/Version Control, VSCode
- **Core Competencies:** IT Policy Development, Hardware/Software Migration, Staff Training, Tech Support

PROFESSIONAL EXPERIENCE

Bohl Equipment Company | Toledo, OH

IT Manager (1999 – 2022)

- Directed end-to-end IT department operations, delivering strategic technical leadership and continuous support across the enterprise.
- Spearheaded comprehensive migrations to modern platforms, successfully improving system efficiency by 30%.
- Developed, implemented, and enforced corporate IT policies, procedures, and security protocols.
- Designed and conducted regular training programs to onboard staff to new software and hardware systems.
- Maintained core infrastructure and resolved complex system issues, ensuring high availability and uptime for business-critical applications.

INDEPENDENT DEVELOPMENT & PROJECTS

Continuous Education & Programming (2022 – Present)

- **Backend & Discord Bot Development:** Architected and deployed Curio.Byte, a production Discord bot using Node.js and discord.js, featuring moderation tools, and automated server infrastructure setup. Developed a modular, permission-managed server event logging system.
- **Multi-Provider AI & Local LLM Integration:** Engineered a multi-tier AI failover strategy integrating cloud LLM providers (Groq, Cloudflare Workers AI, Gemini, OpenRouter, Venice) alongside local Ollama LLM deployments on VPS instances to automate code reviews, prompt testing, and developer workflows.
- **Responsive Web Development & Systems Integration:** Designed and maintained personal web infrastructure featuring responsive static web architecture and custom JavaScript client-side theme preference management. Managed linux systemd service deployments, continuous operation, and repository version control with Git and VSCode.
- **Virtualization & Systems Management:** Configured and managed Hyper-V virtual environments for testing and deploying Ubuntu Linux and Windows 11 instances.
- **Modern Version Control:** Leveraged Git and VSCode to maintain clean, scalable codebases across Node.js and Go projects.

EDUCATION

Owens Community College | Toledo, OH – *Associate of Applied Business – Computer Programming Technology* (1996)

Penta Career Center | Perrysburg Township, OH – *High School Diploma – Focus in Accounting and Computing* (1989)
